Diesel 2" Water Transfer Pump with eStart

MLD20E

The MLD20E is a diesel powered 2" Water Transfer Pump. The heavy duty pump, with cast aluminium housing, fitting and impeller, is driven by a reliable Lister Petter diesel engine. This diesel powered pump offers impressive fuel efficiency, reliability and safety. The sturdy rollover frame ensures that the MLD20E is highly portable and rugged.

This pump is perfect when you want reliability, portability and efficiency for your water transfer tasks. It is suitable for a range of applications including tank or dam transfer and filling, stock watering, irrigation, and site dewatering.
